Gum System is the revolutionary portable device for chewing gum removal, a problem that affects different urban facilities like schools, universities, railway stations, airports, shopping centers, etc.

Before Gum System the available solutions, like high pressure and steam cleaners, were expensive, bulky, noisy, inefficient and not really ecological. Now there is a better and practical solution for chewing gum removal: Gum System.

Gum System turns the chewing gum into a powder easy to brush away without ruining the surfaces, thanks to a sugar beet based detergent and to its application lance.
